

To all it may concern:

It is absolutely forbidden that students share or copy answers between themselves on a final exam or midterm. It is also a violation of University standards of behavior and warrants referral to the Honor Council for action, as described in the University of Miami Undergraduate Honor Code.

Any suspected incident of cheating on the midterm, when the evidence is clear, results in an immediate nullification of the answer (zero points) for all involved, while pending further decision for action.

I am not interested in catching, chastising, or reforming cheaters. My interest is in protecting fairness for the entirety of the class. For the students that do their work fairly, I must defend the integrity of the course.

I please ask those students that see their work here in so narrow a vantage point as to disregard the hard work of others, to recalibrate their goals.

Thank you for your consideration of these sentiments, and for your participation in Theory of Computation, Fall 2019-2020 semester.

Burton Rosenberg  
Associate Professor  
Department of Computer Science  
University of Miami

The 23rd of March, 2020.
